Brief for the Web Team: New “Become a Partner” Page

Sharif Group Marketing Team · 19 October 2026 · To go with `Sharif-Partners-Demo.zip`

We want to invite people and companies who can refer clients to us, such as **immigration agencies**, **law, accounting and wealth-management firms**, **real estate and travel agencies**, and **individuals with a network**. For this we need a **short page** at `/partners/`. It should give a brief overview and lead straight to a simple application form.

> **Please note:** the attached file is only a demo to show the idea, content and form. Feel free to use your own creativity to make this section look more professional and to integrate it better with the rest of the website.

Where it goes on the site

Place	What to add
“About Us” dropdown	**“Become a Partner”** as the last item, with a small “New” badge. Same in the mobile menu.
Footer, Quick Links	**“Partner With Us”** link
Homepage	A slim band just above the footer with a **“Become a Partner”** button
New page	`/partners/` in English, Persian, Arabic and Chinese, plus a thank-you page (noindex)

What the page contains (kept short on purpose)

1. **Hero:** title, a two-sentence intro and one “Apply now” button.
2. **Who we work with:** three one-line items (agencies, professional firms, individuals with a network).
3. **How it works:** three short steps: *Apply → Introductory call & due diligence → Partnership agreement*.
4. **Application form**, next to the two blocks above on desktop and below them on mobile.

Application form

Fields: partner type (agency / company / individual), full name, company name (not needed for individuals), country, email, WhatsApp number (default +971), an optional message, and a consent checkbox.

Submission: please send it through the same route as the other site forms, using `form_id: "partner-application"`. Save it to a **new Google Sheet tab,** `Partner_Applications`, and email each new application to **mohammad@sharifgroup.ae**. If the same email applies twice, no new row should be created.

Rules

- No commission percentages or amounts, and no mention of government agent licences on the page.
- No promises of approval, timelines or results.
- All four languages should be supported. The Arabic and Chinese text should be reviewed by a fluent speaker.

What’s in the zip file

`index.html` (clickable demo) · `docs/HANDOFF.md` (technical details and tests) · `locales/*.json` (text in 4 languages) · `screenshots/`

The demo does not send any data anywhere. Contact for this page: Mohammad, mohammad@sharifgroup.ae
