Brief for the Web Team: New “Become a Partner” Page

Sharif Group Marketing Team · 18 October 2026 · To go with `Sharif-Partners-Demo.zip`

We want to build a network of partners who refer clients to us: **immigration agencies and consultancies**, **professional firms** (law, accounting, real estate, travel) and **individual introducers**. For this we need a new page at `/partners/` where they can learn about the partnership and apply. The zip file contains a **clickable prototype** in all four languages. It is not production code, so please build it on the current website platform, in the same way as the Webinars section.

Where it goes on the site

Place	What to add
“About Us” dropdown	**“Become a Partner”** as the last item, below a divider, with a small “New” badge. Same in the mobile menu. Please don’t add it as a top-level menu item or a header button, because those are for clients.
Footer, Quick Links	**“Partner With Us”** link
Homepage	A slim dark band just above the footer with a **“Become a Partner”** button
New page	`/partners/` in English, Persian, Arabic and Chinese, plus a thank-you page (noindex)

What the page contains

1. **Hero** with two buttons: “Apply to partner” (scrolls to the form) and “How it works”.
2. **Stats band** with the same numbers as the homepage.
3. **Who can partner:** three cards (agencies, professional firms, individual introducers). Each card’s link opens the form with that type already selected.
4. **What partners get:** six benefits, such as a dedicated partner manager, case updates and training.
5. **How it works:** four steps, from application through introductory call and written agreement to referring clients.
6. **Programmes** partners can offer: citizenship, residency and other services.
7. **Application form** with a “Good to know” box, followed by a short **FAQ**.

Application form

The required fields are partner type, full name, company (not required for individual introducers), country, WhatsApp number (default +971), email and a consent checkbox. Optional fields are job title, city, website or LinkedIn, programmes of interest, expected referrals per year, how they heard about us, and a message.

Please send submissions through the same route as the other site forms, using `form_id: "partner-application"`. Save them to a **new tab,** `Partner_Applications`, separate from client leads and webinar registrations. Please also send an email notification for each new application. If the same email address applies twice, no new row should be created.

Rules that must be followed

- **No commission percentages or amounts** on the page. These are shared later, in a written agreement.
- **No mention of government agent licences or official listings** on this page.
- No promises of approval, timelines or results. The page includes a short note that partners act as independent introducers.
- The design should stay consistent with the current website, and all four languages must be supported. The Arabic and Chinese text should be reviewed by a fluent speaker.

Timeline

Please let us know when you can deliver this page. A testing link before it goes live would be great.

What's in the zip file

- `index.html`: clickable prototype
- `docs/HANDOFF.md`: technical details and tests
- `locales/*.json`: text in 4 languages
- `screenshots/`: desktop and mobile

The prototype does not send any data anywhere. The email address for application notifications will be confirmed by the marketing team.
